a bounded by max(s, s2)
adjacent-band ratio r(n)
product length n (repeats added)
s=0.60, φ=0.01, s2=0.95
s=0.70, φ=0.01, s2=0.90
s=0.85, φ=0.05, s2=0.95
s=0.95, φ=0.02, s2=0.99
b the same data, three windows
apparent s from the tail slope
n* = 15.5
known s2 = 0.95
0.95
0.91
0.61
true s = 0.60
product length n
